Purpose and Summary

This document establishes the Contingency Planning Policy for the University of Arizona. This policy defines the University’s overall contingency objectives and establishes the organizational framework and responsibilities for system contingency planning.

Scope

This policy applies to all Information Systems and Information Resources owned or operated by or on behalf of the University. All University-Related Persons with access to University Information or computers and systems operated or maintained on behalf of the University are responsible for adhering to this policy.
Definitions

**CISO:** The senior-level University employee with the title of Chief Information Security Officer.

**Information Owner:** The individual(s) or Unit with operational authority for specified University Information and responsibility for establishing the controls for its generation, collection, processing, dissemination, and disposal. This individual or Unit is responsible for making risk tolerance decisions related to such Information on behalf of the University and is organizationally responsible for any loss associated with a realized information security risk scenario.

**Information Resources:** University Information and related resources, such as equipment, devices, software, and other information technology.

**Information System Owner:** The individual(s) or Unit responsible for the overall procurement, development, integration, modification, and operation and maintenance of an Information System. This individual or Unit is responsible for making risk tolerance decisions related to such Information Systems on behalf of the University and is organizationally responsible for the loss, limited by the bounds of the Information System, associated with a realized information security risk scenario.

**Information System:** A major application or general support system for storing, possessing, or transmitting University Information. An Information System may contain multiple subsystems. Subsystems typically fall under the same management authority as the parent Information System. Additionally, an Information System and its constituent subsystems generally have the same function or mission objective, essentially the same operating characteristics, the same security needs, and reside in the same general operating environment.

**ISO:** The University's Information Security Office, responsible for coordinating the development and dissemination of information security policies, standards, and guidelines for the University.

**Unit:** A college, department, school, program, research center, business service center, or other operating Unit of the University.

**University Information:** Any communication or representation of knowledge, such as facts, data, or opinions, recorded in any medium or form, including textual, numerical, graphic, cartographic, narrative, or audiovisual, owned or controlled by or on behalf of the University.

**University-Related Persons:** University students and applicants for admission, University employees and applicants for employment, Designated Campus Colleagues (DCCs), alumni, retirees, temporary employees of agencies who are assigned to work for the University, and third-party contractors engaged by the University and their agents and employees.

Policy

All Information Owners and Information System Owners shall ensure contingency plans are documented for those Information Systems that are business critical or subject to regulatory requirements. The plans shall provide preventive measures, recovery strategies, and technical considerations in the event of a disruption.

Contingency plans must include the following:

- procedures for restoring the Information System, including the acquisition and maintenance of
resources needed to facilitate the recovery and/or continuity of essential system functions;

- processes for acquiring and maintaining the resources necessary to ensure viability of the
  restoration procedures;
- training for personnel to execute contingency procedures;
- the assignment of responsibilities to designated staff or positions involved in the execution of
  the plan; and
- readiness and preparedness procedures for the annual review and testing of the plan.

**Compliance and Responsibilities**

**Compliance**

**Tracking, Measuring, and Reporting**

ISO shall initiate mechanisms for tracking compliance with this policy and shall produce reports
representing these measures to support University decision making.

**Recourse for Noncompliance**

ISO is authorized to limit network access for individuals or Units not in compliance with information
security policies (including this one) and related procedures. In cases where University resources
are actively threatened, the CISO shall act in the best interest of the University by securing the
resources in a manner consistent with the Information Security Incident Response Plan. In an urgent
situation requiring immediate action, the CISO is authorized to disconnect affected individuals or
Units from the network. In cases of noncompliance with this policy, the University may apply
appropriate employee sanctions or administrative actions, in accordance with relevant
administrative, academic, and employment policies.

**Exceptions**

Requests for exceptions to information security policies (including this one) may be granted for
Information Systems with compensating controls in place to mitigate risk. Any requests must be
submitted to the CISO for review and approval pursuant to the exception procedures published by
the CISO.

**Frequency of Policy Review**

The CISO shall review information security policies and procedures annually, at minimum. This
policy is subject to revision based upon findings of these reviews.

**Responsibilities**

**University-Related Persons**

All University-Related Persons are responsible for complying with this policy and, where
appropriate, supporting and participating in processes related to compliance with this policy.

**Information Owners and Information System Owners**

Information Owners and Information System Owners are responsible for implementing processes
and procedures designed to provide assurance of compliance with the minimum standards, as
defined by ISO, and for enabling and participating in validation efforts, as appropriate.
Chief Information Security Officer

ISO shall, at the direction of the CISO:

- identify solutions that enable consistency in compliance and aggregate and report on available compliance metrics;
- develop, establish, maintain, and enforce information security policy and relevant standards and processes;
- provide oversight of information security governance processes;
- educate the University community about individual and organizational information security responsibilities;
- measure and report on the effectiveness of University information security efforts; and
- delegate individual responsibilities and authorities specified in this policy or associated standards and procedures, as necessary.

Vice Presidents, Deans, Directors, Department Heads, and Heads of Centers

Pursuant to the President’s memorandum of February 21, 2007, all Vice Presidents, Deans, Directors, Department Heads, and Heads of Centers shall take appropriate actions to comply with information technology and security policies. These individuals have ultimate responsibility for University resources, for the support and implementation of this policy within their respective Units, and, when requested, for reporting on policy compliance to ISO. While specific responsibilities and authorities noted herein may be delegated, this overall responsibility may not be delegated.
